Career Objective summary

Hi I am a software developer searching/software enthusiast searching for a platform to enhance and show case my skills. Always passionate about learning a new thing I can keep myself calm and focus on multi-tasking while being patient.

Educational qualifications

Bachelor of Information Technology BIT (2018-2021)

College: Herald College Kathmandu, Naxal

Intermediate Level: 10+2, Computer Management (2016-2018)

Campus: Nepal Darshan College, Morang

Secondary Level: SLC.

School: Paradise Boarding School

Activities

I'm always passionate about learning a new thing and I'm a quick learner. I've done a course of Learn Ethical Hacking From A-Z: Beginner To Expert and Python3 programming from beginners to advance on Udemy.

Experience

I'm a fresher so that I haven't worked on industry level/software companies but I do have knowledge and concepts. I'm flexible while working in a team. I've done webapp and android app projects using different language and database. Here are my recent projects that I've done:

- **React portfolio Website:** It is a website built by using a React Js. It has a feature of sending email through website to a particular Gmail.
